

## My Youthpass Experience

In September this year I've received my Youthpass certificate- after the INLET youth training in Modra, Slovakia. The training was my first Erasmus experience, and the best week ever-being surrounded by positive people, awesome trainers, learning and discovering burning topics and finding compromise with other participants, and the most important of all- developing skills I'll actually need in real life, unlike school where the most part of learned material won't serve you in daily life. I heard many great things about the Youthpass certificate from our group mentor but I must admit that I've actually forgotten about receiving it until the end of training 🤦, but the last day when we got it was like a cherry on top. Since only two months have passed since I got my certificate, unfortunately I haven't been in a position where I could have used it, but I know I will use it in the future. I'm looking forward to going to Erasmus training or exchanges easily because I'm having youthpass, but not only that, I know my youthpass will help me get international internships or places in colleges or universities. My collage in Zagreb, Croatia is lasting 5 years and I'm surely gonna go to some internship or a semester abroad in that long time and I know that my Youthpass will support me there. My future is bright :)
